**WHY
VISIT US?**

Interactive Learning

Engage your students with hands-on encounters that bring them face-to-face with nature. These experiences foster empathy and a deeper understanding of wildlife.

Curriculum Aligned

Our ADEK-approved educational content aligns perfectly with your school's curriculum, enhancing classroom learning with real-world experiences.

Expert Guidance

Our team of trained educators and guides are on hand to provide insightful, expert led learning, ensuring an enriching experience for all.

Because fun learning lasts forever!

CORE VALUES

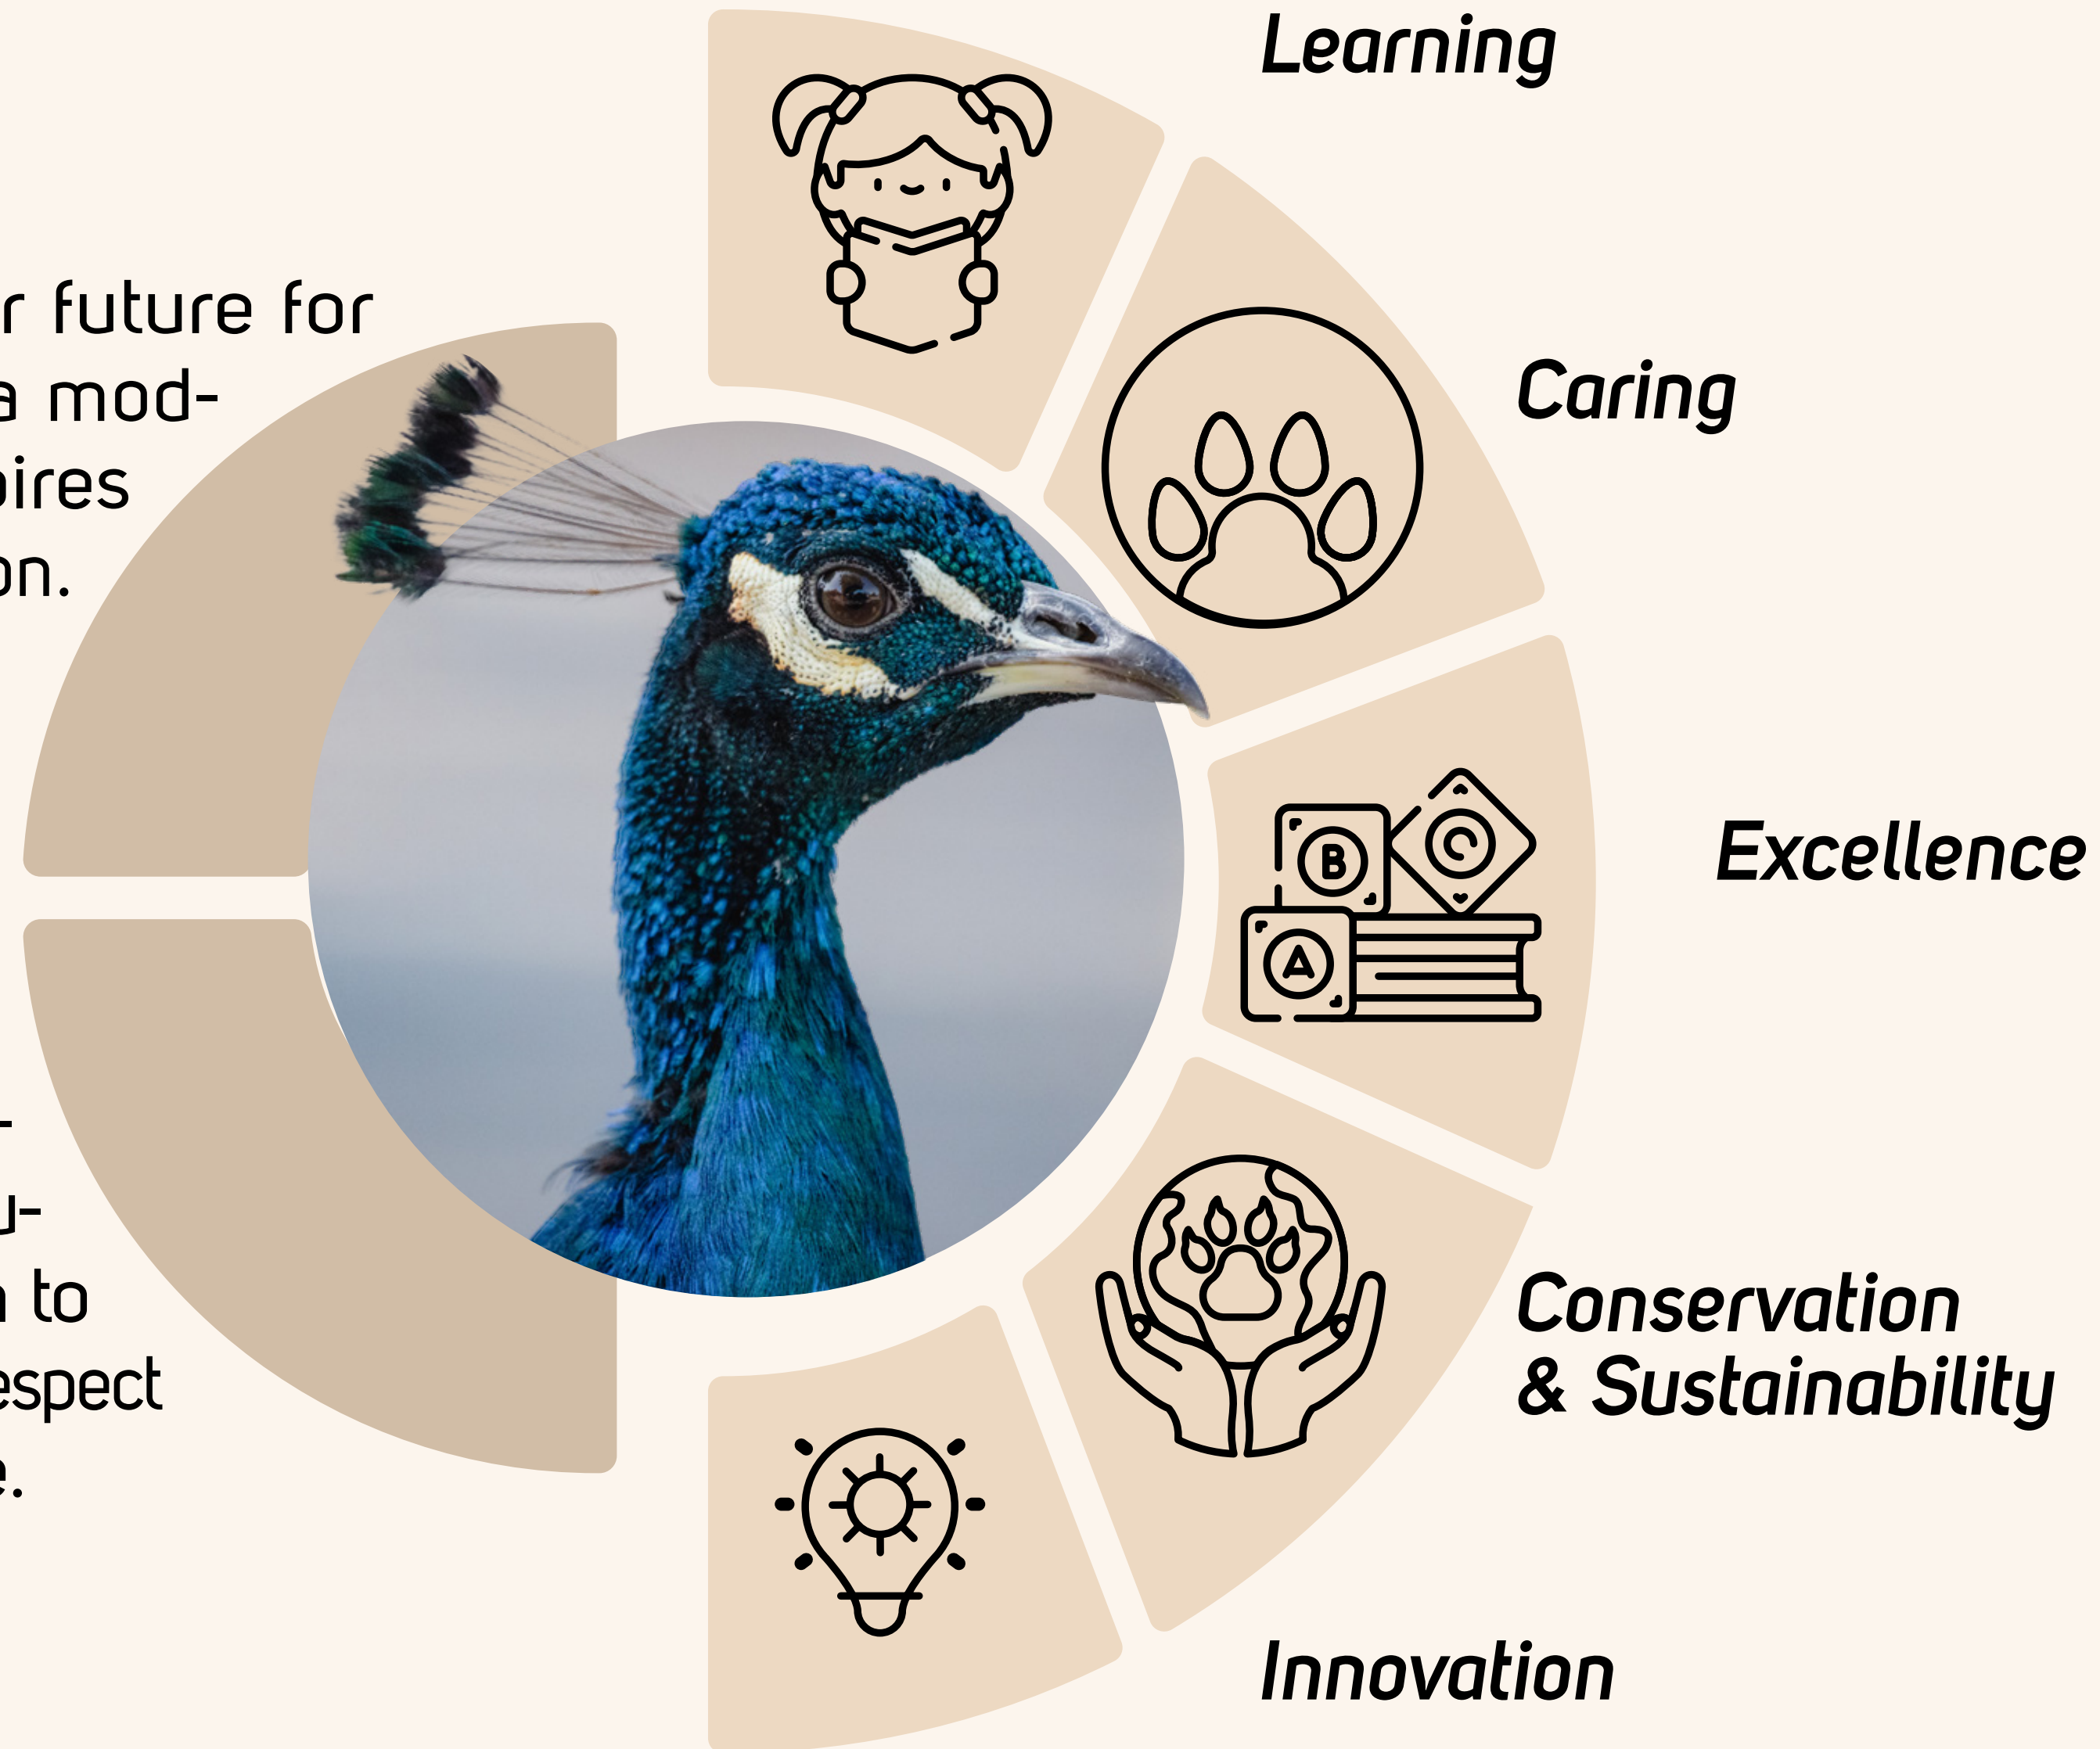

Vision

Creating a better future for wildlife through a modern zoo that inspires wildlife preservation.

Mission

Providing unique and unforgettable experiences rooted in education conservation to empower visitors to respect and conserve nature.

Most of today's conservationists were inspired by wildlife during a school trip to a zoo!

Discover unique, curriculum-based programs! With over 10 years of experience catering to students and schools.

Our friendly educators provide exciting, discovery-driven experiences tailored to your group, all within our extensive facilities.

Interactive Presentations

Guided Zoo Tours with Expert Educators

Up-close Animal Encounters

Curriculum-Aligned Educational Talks and Workshops

**ANIMAL
PRESENTATIONS
& ENCOUNTERS**

Explore their natural behaviours, from communication to social interactions. Learn about their conservation status and the efforts to protect their habitats.

The sea lion presentation perfectly combined fun and learning. Our students laughed, clapped, and learned about marine conservation all at once!

*-Mrs. Hana Al Hosani,
Kindergarden Teacher*

Meet Madu and Radha, our rescued asian elephants. Get up close with these gentle giants and discover their anatomy, communication methods, and social bonds.

Meeting Madu and Radha was unforgettable! I even learned how elephants use their trunks like we use our hands, that blew my mind!

*-Omar Rahman,
Student*

Get ready for the cutest moment of your visit. Feed the playful baby goats and watch their tiny tails wag with joy. Perfect for all ages.

Feeding the baby goats was my favorite part! They were so cute and friendly, I didn't want to leave

-Leila, Grade 3 Student

ANIMAL INTERACTIONS

Small Mammals

Learn about their diverse species, habitats, and crucial roles in the ecosystem. Observe their behaviour and gain insights into their daily lives.

Reptiles

Explore the diversity of reptile species and their vital ecological roles, including their unique physiological and behavioural traits.

Birds of Prey

Learn about their conservation status, unique adaptations, such as keen eyesight and powerful talons, that make them exceptional hunters.

Creepy Crawlies

Explore their crucial roles in ecosystems; decomposition, pollination and discover how their unique adaptations help them thrive in their environments.

TALKS & ACTIVITIES

GUARDIANS OF THE GARDEN

Discover how pollinators keep ecosystems alive and how simple actions can protect them for the future.

Activity

Students will play a hands-on flower and pollinator matching game to learn how pollination works and discover ways to help pollinators daily. They will observe hives and learn how the zoo protects bees, butterflies, and other pollinators.

UAE Curriculum Focus

- 🐾 Life cycles
- 🐾 Ecosystems
- 🐾 Pollinators
- 🐾 Biodiversity and conservation

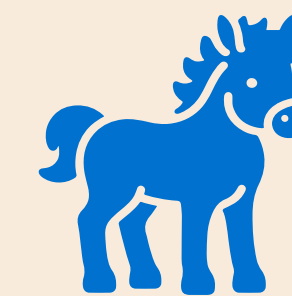

6-9
years old

Meet pollinators like bees and butterflies, learn how they help plants make fruits and seeds, and understand why protecting them is vital.

10-12
years old

Explore a variety of pollinators, their roles in ecosystems and food webs, and how the zoo's Bee Program supports local pollinator health.

13+
years old

Understand the relationships between plants and pollinators, global challenges and how conservation efforts help sustain ecosystems.

3R REVOLUTION

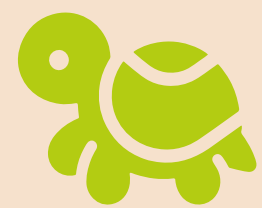

Students will have a hands-on experience on how to reduce, reuse, and recycle to have a significant impact on our planet.

Activity

Students will engage in an upcycling workshop, where they will turn discarded materials (such as paper, plastic bottles or cardboard) into functional items like jewellery.

UAE Curriculum Focus

- 🐾 Environmental science
- 🐾 Human impact on ecosystems
- 🐾 Sustainability practices

4-5
years old

Understand what reduce, reuse, and recycle means and learning why is it important to throw trash in the correct bin.

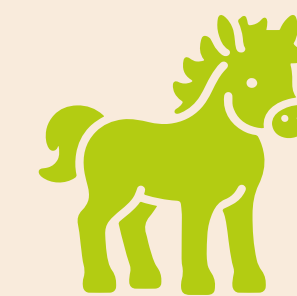

6-9
years old

Introduction to waste and recycling, why is it important to reduce trash, and simple ways to recycle at home and school.

10-12
years old

Deeper exploration of the environmental impact of waste, the importance of conserving resources, and creative ways to reuse materials.

13+
years old

Learn about the global waste crisis, recycling processes, and innovative sustainable practices to reduce human impact on the environment.

VANISHING VOICES

Meet endangered species and explore the conservation efforts to prevent their extinction. Learn about key threats like habitat loss and wildlife trade, and discover how you can help protect them.

Activity

Students will create a "Conservation Map" by linking endangered species to the threats they face worldwide. They'll brainstorm solutions and present a personal conservation pledge to their peers.

UAE Curriculum Focus

- 🐾 Biodiversity
- 🐾 Conservation strategies
- 🐾 Human impact on endangered species

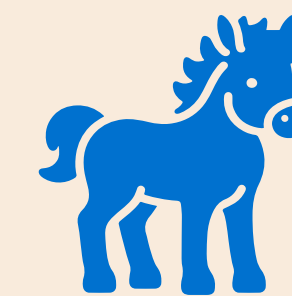

6-9
years old

What endangered means. Introduction to iconic species like tigers and elephants.

10-12
years old

Causes of endangerment: habitat loss, poaching, climate change.

13+
years old

Global conservation strategies: wildlife corridors, breeding programs, community efforts.

TRUNK TALK

Explore the fascinating lives of elephants, their biology, and the importance of conservation. Discover creative ideas like "Poo Paper," where elephant waste is turned into eco-friendly products.

Activity

Students will join the Poo Paper Workshop to see how elephant waste is transformed into eco-friendly paper, discovering how this simple idea reduces waste and supports both elephants and communities.

UAE Curriculum Focus

- 🐾 Conservation
- 🐾 Ecosystems
- 🐾 Sustainable resources use
- 🐾 Innovative solutions

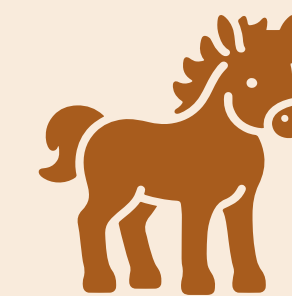

Elephant behavior and their role in nature.

6-9
years old

Threats like poaching and habitat loss; eco-friendly products aiding conservation.

10-12
years old

Links between conservation, local economies, and global protection efforts.

13+
years old

RAINFOREST CONNECTIONS

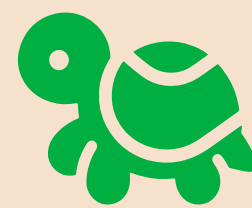

Journey through the rainforest from roots to canopy! Discover how each layer, from the dark forest floor to the sunlit treetops, supports incredible plants and animals, all connected in one of the world's most vital ecosystems.

Activity

Participants will plant a seed or sapling, learn basic plant care, and discuss simple ways to help the environment every day.

UAE Curriculum Focus

- 🐾 Plant biology
- 🐾 Ecosystem
- 🐾 Biodiversity
- 🐾 Conservation awareness

4-5
years old

Explore trees, animals, and plants.

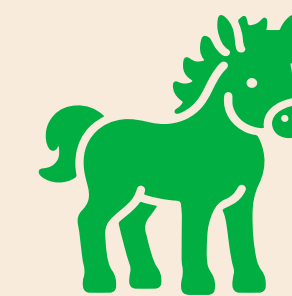

6-9
years old

Learn basic plant needs, simple food chains, and how plants provide oxygen and shelter.

10-12
years old

Understand complex ecosystems, pollination, and the rainforest's role in climate and carbon cycles.

13+
years old

Study biodiversity's importance, global effects of deforestation, and rainforest conservation.

EMIRATI WILDLIFE WATCH

Students will explore the unique wildlife of the UAE while learning about environmental sustainability and how simple actions and creative thinking can help protect local ecosystems.

Activity

Students will explore UAE's native wildlife, from gazelles and oryx to desert foxes and birds. Learn how these animals survive in the desert and why protecting them is key to preserving the nation's natural heritage.

UAE Curriculum Focus

-  Local Ecosystems
-  Habitat preservation
-  Conservation of natives species

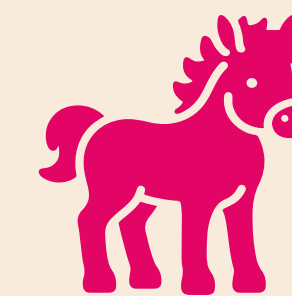

6-9
years old

Introduction to local UAE animals, their habitats, and why protecting them matters.

10-12
years old

Explore habitat loss, UAE conservation efforts and biodiversity's role in ecosystems.

13+
years old

Understand the importance of native species, protected areas and the UAE's global leadership in wildlife conservation.

DINOSAUR DISCOVERIES

Discover how science links the past to the present. Learn how features like feathers, claws, and bone structures show that dinosaurs are not gone, they live on in today's wildlife.

Activity

Students will explore the connection between dinosaurs and their modern relatives using props and live animals. Age-appropriate learning experiences are designed to spark curiosity, creativity, and critical thinking.

UAE Curriculum Focus

- 🐾 Evolution, biodiversity and adaptation
- 🐾 Geological time scale and extinction events

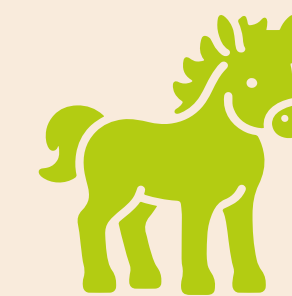

6-9
years old

Learn about dinosaurs, their diets (plant vs. meat eaters), and how birds are living dinosaurs.

10-12
years old

Explore the Mesozoic Era periods, dinosaur adaptations, diets, and what fossils reveal about the past.

13+
years old

Study the evolution of birds from dinosaurs, mass extinctions' impact, and how paleontology informs today's conservation.

MEAL OPTIONS

Healthy Meal

- 🐾 Grilled chicken breast with vegetables
- 🐾 Mashed Potato
- 🐾 Juice

Lunch Box

Choice of 1:

- 🐾 Beef Burger
- 🐾 Chicken Twister
- 🐾 Chicken Nuggets
- 🐾 Fried Crispy Chicken
- 🐾 Veggie Burger

All served with juice, fries & cupcake

Veggie Meal

- 🐾 Penne Arabiata Pasta
- 🐾 Veggie Burger
- 🐾 Cupcake
- 🐾 Juice

Gluten & Lactose Free

- 🐾 Penne Arrabbiata Pasta
- 🐾 Fruits
- 🐾 Juice

SCHOOL PACKAGES

LITTLE BIRDS PACKAGE

Recommended for children aged 4 and below

Benefits

- 🐾 Grass bundle
- 🐾 Zoo admission

Al Karamah School 1 year ago

Everything was super fun.
We enjoyed our trip 😊❤️!
